Sustainable Landscapes Topic of Educational Briefing

May 21, 2012

Garden Vision LLC in collaboration with Glenwood Gardens, announces a garden-oriented educational briefing to be held on June 2, 2012 at 12:00 pm at Glenwood Gardens. "Sustainable Landscapes to Save the World" is the topic of this one hour presentation by Kate Easton, founder of Garden Vision LLC. Based on a recent research paper authored by Kate Easton and 20 years of experience as a professional horticulturist and landscape designer, the special presentation is filled with timely content and thought-provoking, actionable ideas. The presentation will explain how anyone can easily apply sustainability principles in their landscapes in three areas: design, implementation and hygiene.

An attendee of this presentation to Master Gardener's wrote, "In a detailed and reasoned presentation on sustainable landscapes, Kate Easton invited [the] audience ... to consider both big-picture ideas about sustainability and the nitty-gritty practicalities of soil amendments, watering regimes, beneficial and pest insects, plant choices, and, yes, what to do with the dog poop. ... All in all, a thought-provoking and stimulating presentation."

In addition, attendees will have access to the research paper with more details and the opportunity to win a free one-hour consultation from Garden Vision, if they register for the drawing when they arrive for the presentation. Seating for the presentation is limited, and reservations are recommended. Reservations will open the day of the presentation, June 2, at 10 am.

Glenwood Gardens, a small specialty nursery, focuses on easy-care plants with all-year interest, and hardy and adaptable to Pacific Northwest climate. The nursery is located at 15155 Glenwood Road S.W. Port Orchard, WA and is open to the public on designated dates. More information about Glenwood Gardens can be found at www.glenwood-gardens.com.

Garden Vision LLC, a landscape design and horticulture consulting firm, was founded in 1991 and designs living art with color, texture, sightlines and views. More information about Garden Vision can be found at www.gardenvisioninc.com.
